Chai Cha Na Mining Closes First Tranche of Financing

Chai Cha Na Mining Inc. (“Chai Cha Na” or the “Company”) is pleased to announce the closing of the first tranche of the previously announced financing. A total of 700,000 units at \$0.15 per unit for a total of \$105,000 and another 115,000 units of flow through at \$0.20 per unit for a total of \$23,000. Proceeds will be used for the initial Phase I exploration on the Mission North Gold project located just outside Mission, B.C., as well as ongoing general corporate affairs.

Permitting for work has been submitted and will include some initial trenching and shallow drilling once approved. Prior to permitting approval the company is conducting soil sampling, geo chem., grid work and portable VLF in preparation. Recent samples from property returned the following encouraging high grade gold values.

Samples	Au g/t	Au oz/t	Ag g/t	Ag oz/t	Cu ppm	Zn ppm	Pb ppm
#1 (Schaprickyn)	35.4	1.03	118	3.44	6.31	2,643	594
#2 (weight: 13.90 Kg)	185.0	5.40	44.8	1.31	5,390	>10,000 2.37%	>10,000 4.86%
#3 (weight: 6.20 Kg)	84.8	2.47	33.9	0.99	3,470	4900	3,660
#4 (weight: 0.20 Kg)	118.5	3.46	70.7	2.06	9,560	>10,000 4.81%	>10,000 18.75%
#5 (weight: 1.34 Kg)	81.5	2.38	17.2	0.50	1,180	7,160	5,270
#6 (weight: 1.34 Kg)	115.0	3.35	21.9	0.64	1,740	>10,000 1.27%	>10,000 1.13%
#7 (weight: 3.12 Kg)	3.4	0.10	1.6	0.05	198	1,075	2,010

Fred Fisher, President/CEO of Chai Cha Na states *“The results from our initial grab samples from Iain’s Glory vein indicates the potential for a high-grade mineralized system located in an area we believe has never been explored. The Company is planning a systematic exploration program which will initially consist of soil sampling, trenching and a property-wide reconnaissance exercise. The Company has commenced with the required permitting applications and looks forward to reviewing the full potential of this project.”*

All samples were collected and shipped to ALS Minerals (formerly ALS Chemex) of North Vancouver, BC and were subjected to ME-ICP41 and AU-GRA21 testing procedures.

About the Mission North Gold Property

The “Mission North Gold Property”, located approximately 25 kilometres north of Mission, British Columbia, is situated in an area believed to have limited or no previous exploration. Recent logging in the area in the fall/spring of 2008/2009 exposed the newly discovered **“Iain’s Glory High Grade Gold Vein”**, where initial samples identified significant gold, silver, copper, zinc and lead values.

The Iain’s Glory gold vein, exposed by the recent development of a logging road, is located on the eastern flank of a knoll (hillside) at an elevation of approximately 245 metres. The newly discovered vein, visible on the western flank wall of the logging road was exposed with a width of approximately 1.5 metres and visible height of 4 metres. The gold vein appears to continue into the hillside, along strike to the west, and dip steeply the northwest into the hillside at approximately 75 to 80 degrees.

To view a map of the recently acquired Mission North Gold Property, pictures of a rock sample and Iain’s Glory Gold Vein please click on the following link:

General Property Geology

All mineralization is disseminated within a milky white quartz vein of an approximate width of 1.5 metres dipping sub vertically. The rock is weakly oxidized as it is proximal to surface and demonstrates minor limonite staining on the fracture surfaces. No visible gold was identified in the samples. The vein is hosted in what appears to be an igneous intrusive interpreted to be a diorite or granodiorite composition.

Paul Reynolds, P. Geo., a qualified person as defined by National Instrument 43-101, has reviewed and approved the technical disclosure contained in this news release.
