

HealthSaaS.net signs reseller and integration agreement with Biosign

TORONTO, ONTARIO, Friday, December 11, 2009 – Biosign Technologies Inc. (**CNSX: BIO**) (“Biosign” or the “Company”) and HealthSaaS.net announced today they have entered into an alliance agreement that enables HealthSaaS.net to resell Biosign products and integrate patient driven data into the HealthSaaS.net Personal Health Record (PHR) treatment management service..

Biosign and HealthSaaS.net will integrate their platforms for the recording and retrieval of in-office and remote patient vital sign measurements through the HealthSaaS.net PHR.

The first products to be integrated into the HealthSaaS.net PHR will consist of Biosign’s blood pressure and hemodynamic monitors (UFIT[®] TEN-10) including automated reading, scheduling, result verification, tracking, charting and trending.

Alan Paget, CTO of HealthSaaS.net states “we work closely with clinicians and researchers to ensure that our suite of services assist in providing the best possible care for patients and can help improve effectiveness of treatment. Linking the UFIT[®] quality data from in-office encounters, ambulatory protocols, and remotely monitored patients into HealthSaaS.net PHR is an invaluable meaningful use solution that will help facilitate proactive treatment of patients.”

“We are continuing with our strategy of partnering with key EMR and PHR vendors to enable the availability of integrated solutions for patient management. We believe that the HealthSaaS’ innovative suite of patient care services, their robust PHR, and our UFIT[®] platform collectively create an end-to-end solution for better patient care in the U.S marketplace.” remarked John Anders, Vice President of Business Development for Biosign

About Biosign Technologies Inc.

Biosign provides biomedical systems. Key applications include intelligent systems for noninvasive monitoring of common health risks associated with blood pressure, glucose, and medication. The core technology combines measurement, analysis, and rapid knowledge formation to support health monitoring across global markets. The UFIT[®] medical device technology powers quality data collection and analytics for clinical diagnostics, self-care, wellness, disease state evaluation & management, and remote patient monitoring.

About HealthSaaS.net

The HealthSaaS.net PHR is a web based Software as a Service (SaaS) application that enables patients to record multi-conditions/multi-doctors, pain locations, pain types, pain intensity, medications, naturopathic remedies, sleep patterns, treatments, therapies, exercise, activities, additional symptoms, and quality of life concerns.

The HealthSaaS.net PHR facilitates better communication between patients and their healthcare providers through account file sharing or secure Provider Portals. Patient driven report data will help providers identify

both effective and ineffective treatments and medications. Healthcare providers may then make treatment and medication modifications to improve efficacy and provide patient-members with a more consistent and improved quality of life.

HealthSaaS.net also offers fee based services to support clinical trials and research studies. Fee based analytic services are available to help clinicians, researchers, pharmaceutical companies, and payors improve efficiencies.
