**Chai Cha Na Mining Mission North Gold Property Chip Channel Samples
Demonstrates Low Grade Host Rock contains the Iain Glory Vein.**

Chai Cha Na Mining Inc. (“Chai Cha Na” or the “Company”) is pleased to announce results from an ongoing regional sampling, reconnaissance and mapping program conducted on the North Mission Gold Property, located approximately 25 kilometres north of Mission, British Columbia, Canada.

A chip sampling program was conducted to determine the grade of the host rock immediately adjacent to and including Iain’s Glory vein. Sampling was conducted across nine metres of exposed outcrop including the Iain Glory vein. Sampling successfully determined the host wallrock contains low grade gold mineralization.

Mineralization in the wallrock is typically present in the form of disseminations, clots and veinlets of partially oxidized pyrite and chalcopyrite. Several brittle fault structures can be observed within the exposed outcrop some of which are mineralized along the fracture surface. (see www.chaichanamining.com website for maps and pictures).

Fred Fisher, President/CEO of Chai Cha Na states “*Our Mission North Gold Property not only contains multiple high grade gold veins but now is showing indications that lower grade mineralization continues into the footwall and hangingwall zones of the system. This is exciting for the Company and for the project. We continue to advance the project aggressively and look to fully evaluate this gold project.*”

Samples collected were run using a gravimetrically finished gold assay and ICP multi-element analysis. These new samples along with all previous samples were processed by ALS Chemex Labs of North Vancouver, British Columbia. Results to date show there is Au correlations associated with Ag, Cu, Pb, Zn and Cd mineralization.

Sample No.	Width m	Comments	Au g/t	Ag g/t
H540804	1.00		0.13	0.3
H540805	1.00		0.10	0.2
H540806	0.50		1.40	2.8
H540807	0.50	Iain Glory Vein	33.60	19.4
H540808	1.00		0.43	0.6
H540809	1.00		0.52	0.4
H540810	1.00		0.42	0.3
H540811	1.00		0.23	0.4
H540812	1.00		0.03	0.1
H540813	1.00		0.03	0.2

About the Mission North Gold Property

It is situated in an area believed to have limited or no previous exploration. Recent logging in the area in the fall of 2008/2009 exposed the newly discovered "Iain's Vein Glory High Grade Gold Vein" where initial samples identified significant gold, silver, copper, zinc and lead values as previously released in previous news releases.

About Chai Cha Na Mining Ltd.

Chai Cha Na Mining (CNSX:CNN) is a Canadian mineral exploration company focused on projects offering the potential for significant upside both in the precious and base metals sector. Currently the primary focus of "the Company" is early stage development of the Mission North Gold property located 25 kilometres outside of Mission, B.C. The Company also has an option to earn a 100% interest in the Golden Summit project located in the historic Pioneer/Bralorne gold camp in southern British Columbia, and an option to earn a 100% interest in the Fox River nickel project located in northern Manitoba.

Forward-Looking Information:

This release may include certain statements that may be deemed "forward-looking statements". All statements in this release, other than statements of historical facts, that address future production, reserve or resource potential, exploration drilling, exploitation activities and events or developments that Chai Cha Na Mining (the "Company") expects to occur, are forward-looking statements. Such statements are identified in this release by the use of words such as "will" and "expected" as well as the use of the future or conditional tense. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the forward-looking statements. Factors that could cause actual results to differ materially from those in forward looking statements include market prices, exploitation and exploration successes, and continued availability of capital and financing and general economic, market or business conditions. Investors are cautioned that any such statements are not guarantees of future performance and actual results or developments may differ materially from those projected in the forward-looking statements. The Company does not assume any obligation to update or revise its forward-looking statements, whether as a result of new information, future events or otherwise.
