1. General Overview and Discussion

Bird River Mines Inc. (BRMI) is a Winnipeg based resource exploration company that formerly owned a Manitoba mining property named the Ore Fault. The property was sold to Marathon PGM Corporation and BRMI retains a 1% net smelter royalty in the Property.

BRMI presently holds a Quarry Lease, located 85 km southwest of Winnipeg near Miami, Manitoba. The 8 hectare lease hosts a narrow bed of bentonite. The Company also engages in secondary activities, from time to time, involving the purchase or acquisition of certain industrial minerals – typically diatomaceous earth and bentonite – for distribution and re-sale or for use in an abandoned water well sealing operation. Additionally, the company has a four percent net interest in three producing oil wells in southwestern Manitoba.

Bird River Mines Inc.’s board of directors, officers and committee members are as follows; Nelson Shodine, President & CEO, Jon Bridgman, CFO, Ed Thompson, Secretary Treasurer, Mel de Quadros, Director and Shane Shodine, Director. The Audit and Compensation Committee is comprised of Ed Thompson and Mel de Quadros.

2. Activities of Management

Management continues to review business opportunities and oil & gas investment projects while monitoring business and economic conditions. The Company’s abandoned water well sealing service is progressing slowly due to continued wet weather. The Company’s oil and gas joint venture with Antler River Resources continues to move forward. Three wells have been drilled near the towns of Sinclair and Pierson in south western Manitoba. All three wells are in production. Bird River Mines Inc. has a 5% gross interest (4% net) in the wells. The third well was drilled in December 2009 is a vertical oil well which is now pumping about 22 bpd. The company is currently evaluating new oil and gas exploration opportunities in south western Manitoba. In this regard, Bird River Mines will be participating in a new horizontal well to be drilled by Antler River Resources in the Sinclair area of Manitoba in proximity to our producing well at 14-15-8-28W.

3. New Exploration Activities

During the month of August 2010 the Company did not enter into any new resource exploration activities.

4. Exploration Activities – Amended or Abandoned

17. Trends Impacting the Company

Mineral and oil exploration is a speculative venture. There is no certainty that expenditure on exploration and development will result in the discovery of an economic ore body or producing oil well. The Company's viability and potential success lie in its ability to develop, permit, exploit and generate revenue out of mineral deposits and/or oil reserves. Revenues, profitability and cash flow from any future resource operations involving the Company will be influenced by precious metal, base metal and/or oil prices and by the relationship of such prices to production costs. Such prices have fluctuated widely and are affected by numerous factors beyond the Company's control. The Company has limited financial resources and there is no assurance that additional funding will be available to it for further exploration and development of its projects or to fulfill its obligations under applicable agreements. There can be no assurance that the Company will be able to obtain adequate financing in the future or that the terms of such financing will be favourable. Failure to obtain such additional financing could result in delay or indefinite postponement of further exploration and development of the property interests of the Company with the possible dilution or loss of such interests.

BRMI is dependent upon the personal efforts and commitment of its existing management who are not all full-time employees of the Company. To the extent that management's services would be unavailable for any reason, the Company's operations could be disrupted. The Company may retain the services of outside consultants from time to time.
